

INFORMATIONAL NOTICE

Your dentist is using
Rebrief to augment
your *care experience*.

Rebrief is an **AI documentation assistant** that works in the background of your appointment and helps your dentist complete clinical documentation.

The result: more eye contact, fewer interruptions, and a more accurate record of your care – always reviewed and signed off by your dentist before it enters your chart.

AUDIO IS NEVER STORED

Recordings are permanently deleted the moment your clinical note is generated – usually within seconds.

ENCRYPTED & PRIVATE

Your data is protected with bank-grade AES-256 and TLS encryption, on HIPAA- and PIPEDA-aligned infrastructure.

ALWAYS YOUR CHOICE

If you'd prefer your visit not be assisted by Rebrief, simply let your dentist know – no questions asked.

TRUSTED BY

McGill University · Harvard Medical School · National University of Singapore · UCSF

Have questions?

Speak with our staff or talk to a human at **rebrief.ai/live-support** – we're happy to walk you through it.
